

REMARKS:

Applicant has received the Office action mailed August 3, 2006 and the subsequent following correspondence requiring that extraneous text be removed from the claims.

Applicant notes with appreciation the cooperation and curtesy shown by the Examiner to applicant's attorney during the telephone interview conducted on January 18, 2007. During the interview, the Examiner indicated that the claims submitted in the Amendment filed on November 3, 2006 (which required resubmission due to extraneous text) distinguished over the art of record, but that the Examiner wanted certain passages in the claims to be more definite. The present amendment is believed to both make the claims more definite in accordance with the changes discussed in the telephone interview, while removing all extraneous text.

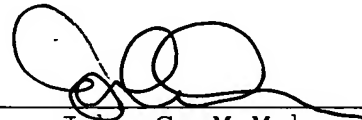

It is noted that Claims 2, 3, 12, 13 and 14 are hereby canceled without prejudice and that Claims 33, 34, 35, 36 and 37 are prior Claims 2, 3, 12, 13 and 14 respectfully rewritten independently.

The Examiner has also requested that certain terms be noted in the specifications. The term axial center is described on page 16, line 20 and the terms center line and median plane are described on page 25 beginning on line 20. The median plane is identified by the numeral 102 in Fig. 13.

Consequently, it is urged that the pending claims are now allowable and notice to this effect is earnestly solicited.

The Examiner is invited to contact the undersigned if there are any further issues.

Respectfully Submitted,

John C. McMahon
